Dreamweaver CS6 Unit D Skills Review

Project files butterfly.jpg, gardening_tips.doc, and tips.html. Here is the checklist of changes to the tips.html page:

Element	Completed
A new file is opened and saved in the Blooms & Bulbs Web site as tips.html, overwriting the existing file. The page title Blooms & Bulbs is added to the title text box. Banner is inserted from your assets folder to the top of the page and includes appropriate alternate text. The butterfly.jpg image file is inserted from the Unit D folder in the shared drive and appropriate alternate text is entered. The garden_tips.doc text file is imported to your webpage.	<input type="checkbox"/>
The Seasonal Gardening Checklist heading and the Gardening Tips heading are centered, formatted with the Heading 1 style.	<input type="checkbox"/>
The items in the Seasonal Gardening Checklist are formatted as an unordered list. Gardening Tips items are included are formatted in an ordered list.	<input type="checkbox"/>
A new style called bold_gray is saved and the style sheet file is saved as blooms_styles.css in the blooms folder. The font of the bold_gray style is Arial, Helvetica, sans-serif, font size small, bold, color #333. The bold_gray style is applied to the words Fall, Winter, Spring, and Summer. Text size is edited to medium.	<input type="checkbox"/>
CSS blooms_styles.css is attached to the index page. On the tips.html page, the body_text rule is applied to all remaining text on the page. A spellcheck has been run on the tips page and any misspellings have been corrected.	<input type="checkbox"/>
