pruned to any size. The one you see on the right is Southern Belle. Check out all our varieties as you will not fail to have great color with these plants.

The Candy Cane Floribunda shown on the left is a beautiful rose with cream, pink, and red stripes and swirls. They have a heavy scent that will remind you of the roses you received on your most special occasions. These blooms are approximately four inches in diameter. They bloom continuously from early summer to early fall. The plants grow up to four feet tall and three feet wide. They are shipped bare root in February.

In addition to these marvelous roses, we have many annuals, perennials, and water plants that have just arrived. Join us Saturday at 9:00 for a class on hanging baskets.

The tips page is shown below.

- **Winter** – The time to prune fruit trees and finish planting your bulbs. Don't forget to water young trees when the ground is dry.
- **Spring** – The time to prepare your beds, plant annuals, and apply fertilizer to established plants. Remember to mulch to maintain moisture and prevent weed growth.
- **Summer** – The time to supplement rainfall so that plants get one inch of water per week. Plant your vegetable garden and enjoy bountiful harvests until late fall.

Basic Gardening Tips

1. Select plants according to your climate.
2. In planning your garden, consider the composition, texture, structure, depth, and drainage of your soil.
3. Use compost to improve the structure of your soil.
4. Choose plant foods based on your garden objectives.
5. Generally, plants should receive one inch of water per week.
6. Use mulch to conserve moisture, keep plants cool, and cut down on weeding.
